P. D. FULWOOD
TIFTON, GA.
1935

THE above views were taken in my plantation office—the top picture shows my private office and at the bottom is shown two other offices and a portion of my office force. It takes skill and experience to handle the thousands and thousands of orders which pour in during the planting seasons. Speed is needed to get these orders out in time to be shipped immediately. Accuracy is needed, too, so that your order is properly filled with full count and proper varieties.

FREE PLANTS

In order to increase my mailing list I will include with your order 50 extra

Cabbage or Onion plants free of charge, if you will write below the correct names and addresses of your friends or neighbors. Each name must be the head of a family that regularly buys plants. Please write carefully and plainly, giving full address. No free plants will be sent for incorrect and carelessly written lists. The list must be sent with an order for plants.

REMARKS:

PLAY SAFE WITH FULWOOD

I POSITIVELY guarantee all of my plants to be exactly as described in this catalogue. I guarantee them to be fresh, pure, genuine, and unadulterated. I guarantee them to be carefully selected, pulled one at a time, and counted and bundled right in the fields.

As far as I know, I am the only plant grower pulling plants one at a time. This, I find, eliminates the possibility of poor sorting, and as only well-developed, hardy, well-rooted plants are pulled, you are sure of receiving plants of the highest quality with no runts, weeds, or trash, as is usually the case where plants are sold at cheap prices. In the long run, this means my plants are really cheaper for you, as it costs real money to ship runts and trash by mail or express.

I use the most expensive crates I can buy so that the fine plants I ship will reach you in perfect condition, and these crates are so made that they are very light in weight, and here again, you save express charges.

Through my efforts express rates on plants have been greatly reduced so your express costs will be much less. Note bottom of order blank about express rates on plants.

You run no risk in ordering your vegetable plants from me. My plant business is my sole support, and my success depends entirely upon my ability to furnish my customers with the finest quality of plants at reasonable prices. The way I figure it is that if you are not pleased with the quality of my plants, and if I don't get them to you on time, and that if I should furnish you with short count, or runts, or diseased plants, or if I should ship you different varieties than ordered, then I know you are not coming back to me next year. This is nothing but selfishness on my part, but I want your business and I want you to keep coming back to me year after year, the same as thousands of other people are doing.

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

You can make real cash—and plenty of it in raising Cabbage from Fulwood's Genuine Frost-Proof Cabbage Plants. You can easily raise from six to ten tons per acre. Think of the profits you can make. Set out all the Cabbage you can, as early as possible in your locality, and you will be the man with money in the bank when your crop matures.

Vegetables sold early in the season bring many times the price of those marketed several weeks later. Fulwood's Genuine Frost-Proof Cabbage Plants produce full-grown heads from two to three weeks before home-grown plants—and that's why they are a real money-maker for the gardener.

Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough,

(See Special Garden Collections on Page 13)

hardy, healthy Cabbage plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight to ten weeks' old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot bed, or cold frame plants.

These Frost-Proof Cabbage plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 or 20 degrees.

Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crops—all ready for marketing during the time prices are highest. Many unreliable growers are selling plants and are calling them "frost-proof." In many instances these growers are located where they do not have frosts during the growing period and therefore the plants they are offering have never been subjected to frosts.

Where my plantation is located we have light frosts all through the winter growing season and as all of my plants are grown right out in the open fields, Mother Nature provides them with the strength and stamina to withstand cold temperatures. Be sure you buy genuine FROST-PROOF plants for a sure crop.

This year I have acre after acre of the finest Cabbage plants I have ever had. Climatic conditions have been perfect and they are in unusually fine condition, being tough and hardy and ready to start growing in your ground whenever you can plant them in your locality. I treat all my seed before planting to prevent disease and as further precautions, I change my lands each year and spray the plants often during cultivation.

Cabbage plants are planted every month in the year and shipments can be made at all times.

Stanwood, Iowa, Aug. 24, 1934.

Dear Sir: Your frost-proof cabbage plants are the only ones to plant. My neighbors have none this year. MRS. EMIL NANKE.

Pollock, La., June 7, 1934.

Dear Sir: I have used your plants for 3 or 4 years and have had better success with them than any other. Yours truly, E. S. SLAYTER.

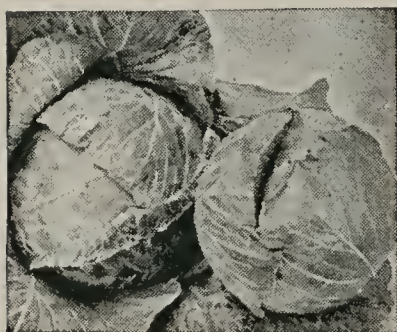

(See Special Garden Collections on Page 13)

VARIETIES OF FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best cabbage grown. Its merits are many, among which are medium heads for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker. See prices on page 5.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few outer leaves of an upright growth. My stock of this popular variety is extra early, uniform and dependable. See prices on page 5.

GOLDEN ACRE

This variety has the same general description as the Copenhagen Market—and in fact, is a strain of that variety. Some growers prefer this variety which is priced the same as my other varieties. See prices on page 5.

SUCCESSION

The earliest of the flat-head varieties. A sure header and a very hardy grower both in cold and warm weather. This is grown very extensively in the South and gives universal satisfaction. Heads are of uniform shape, not too flat and exceptionally solid. See prices on page 5.

Deerfield, Wisc., Oct. 18, 1934.

Dear Mr. Fulwood: All of us are well pleased with your cabbage plants and know where to get them another year. One of our neighbors has gotten frost-proof cabbage plants from another firm for two years and their cabbage was soft and loose and not firm like your cabbage. We had heads that weighed 14 pounds last year and 12 pounds this year.—MRS. V. RATZLOW.

(See Special Garden Collections on Page 13)

CHARLESTON WAKEFIELD

This Cabbage is much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a desirable variety for shipping purposes as the heads are solid and firm. It is a strong favorite with growers for a main crop. See prices below.

EARLY FLAT DUTCH

One of the oldest varieties. The head is unusually large and flat, tender and fine grained. My strain of this Cabbage is of the best to be had. It is excellent for a tonnage crop because of the large heads. See prices below.

CABBAGE AND ONION PLANT PRICES

All Varieties at Same Prices

Owing to climatic conditions, we plant every month in the year and have good cabbage and onion plants the year round, and they can be ordered at any time. All cabbage plants are tied in bunches of fifty plants. Onion plants are tied in bunches of one hundred plants.

FROST-PROOF CABBAGE AND ONION PLANT PRICES

10,000 plants and over.. ..	1.00 per 1,000

(See Special Garden Collections on Page 13)

FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

Like all Genuine Fulwood Vegetable Plants, my onion plants are grown, packed and shipped with the utmost care and precision. Plants are grown from the finest seed I can obtain. All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand tem-

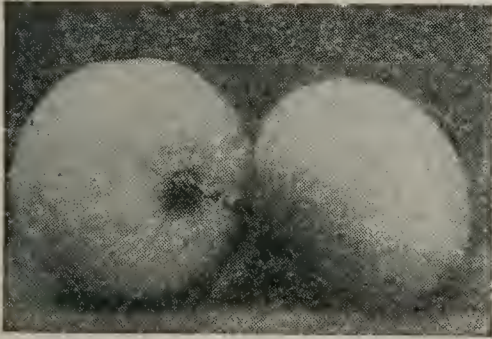

peratures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion Plants are also an excellent money crop as they can be marketed at least two weeks in advance of onions grown from sets and way ahead of onions grown from seed. Furthermore, my plants will make much better onions than those grown from sets, the onions being larger and they do not run to seed. They will also keep much better when cured and stored.

Fulwood's onion plants are planted every month throughout the year and can be shipped at any time.

My Onion plants should be set out the same time as my Cabbage plants and you can order them for shipment at the same time. Prices are the same as for Cabbage plants and I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire.

(See Special Garden Collections on Page 13)

VARIETIES OF FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating onion.

SPANISH VALENCIA (or Sweet Spanish)

This variety can be grown in warm climates as successfully as the Bermuda varieties and much more successful in Northern climates. This is a large globe-shaped brownish yellow onion of large size. The flesh is white, fine-grained, mild and sweet enough to be eaten like an apple. A good keeper and fine shipper when properly cured. Has been known to yield 1,200 bushels per acre.

ONION PLANT PRICES

Fulwood's Genuine Frost-Proof Onion Plants are ready for shipment any time from September 1st to June 1st following. All Onion plants are tied in bunches of 100 plants. Onion plants are priced the same as Cabbage plants, for all varieties, and should be set out the same time. I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire. See price list on page 5.

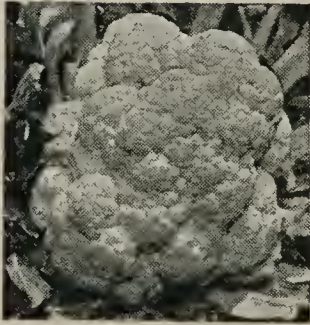

Warrior, Ala., July 10, 1934.

Dear Sir: I always find Fulwood's plants to be the best that money can buy. Everybody says my cabbage patch is the prettiest they have ever seen anywhere. Yours very truly, WALTER CALVERT.

(See Special Garden Collections on Page 13)

OTHER FULWOOD'S GENUINE FROST-PROOF PLANTS

(Ready Sept. 1st Until June 1st)

FULWOOD'S GENUINE FROST- PROOF CAULIFLOWER PLANTS

SNOWBALL VARIETY

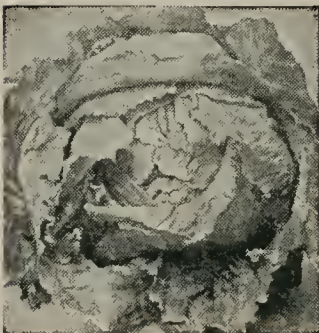

Why be satisfied with a later crop at ordinary prices when you can buy my plants and have an extra early crop which can be sold at top prices. The Snowball variety makes a large, perfect, sure header of excellent quality. Prices by parcel post, postpaid: 100 plants for **75c**—500 plants for **\$2.00**—1,000 plants for **\$3.00**. Prices for shipment by express collect, any quantity, **\$2.50** per 1,000 plants.

FULWOOD'S GENUINE FROST-PROOF BEET PLANTS

CROSBY EARLY EGYPTIAN VARIETY

This is probably the most popular beet grown and I specialize in this one variety because it is the finest all-around home garden and market beet and can be grown in all localities successfully. Have an extra early crop by ordering your beet plants from me. Prices same as for Cauliflower plants.

FULWOOD'S GENUINE FROST- PROOF LETTUCE PLANTS

ICEBERG VARIETY

Have this very finest variety of lettuce ready for market way ahead of lettuce planted from seed. I plant only this one dependable variety because of its quality and dependability as a sure cropper. Prices same as for Cauliflower plants.

(See Special Garden Collections on Page 13)

FULWOOD'S SPRING PLANTS

(Not Frost-Proof) Ready April 1st to June 1st.

FULWOOD'S IMPROVED PORTO RICO SWEET POTATO PLANTS

The Real Southern Yam

Southerners who know their Yams will appreciate this Improved Porto Rico as the finest ever. People in the East and Middle West who know sweet potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Improved Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety. Prices by parcel post prepaid: 500 plants for **\$2.00**; 1,000 plants for **\$3.00**. Prices by express not prepaid: 1,000 plants to 4,000 plants at **\$2.50** per 1,000; 5,000 plants to 9,000 plants at **\$2.75** per 1,000; 10,000 plants and over at **\$2.00** per 1,000.

FULWOOD'S TOMATO PLANTS

**VARIETIES: GREATER BALTIMORE,
MARGLOBE AND BONNIE BEST**

Ready April 1st to Sept. 15th

I ship more Tomato plants than any other grower, shipping them by the millions to practically every state in the Union to both large and small canning factories, truck farmers, gardeners and to individuals who grow tomatoes for their own use. I have developed these varieties to a very high state and my plants are exceptionally well rooted, large and stocky. They are all open-field grown and are acclimated to outside temperatures and will start growing quickly and produce rich, red ripe tomatoes much earlier and more surely than home-grown plants. Tomato plants

(See Special Garden Collections on Page 13)

are not frost-proof, however, and should not be ordered shipped until all danger of killing frost is past. My Tomato plants are not perishable and when packed as I pack them in deep, damp moss they will keep in good condition for several days. Order Bonnie Best for early market and home garden use. The Marglobe is wilt-resistant and the fruit is of medium size, solid, good color and good shipper and will make a fine main crop. The Greater Baltimore variety is a mid-season tomato and is used more by canners than any other, producing a very heavy crop of large solid tomatoes and a sure cropper. *Prices by parcel post, prepaid*: 100 plants for 50c; 500 plants for \$1.75; 1,000 plants for \$2.50. *Prices by express collect*: 1,000 plants to 4,000 plants at \$1.75 per 1,000; 5,000 plants to 9,000 plants at \$1.50 per 1,000; 10,000 plants and over at \$1.25 per 1,000.

FULWOOD'S PEPPER PLANTS

VARIETIES: WORLD BEATER AND RUBY KING

Both of these varieties are exceptionally sweet and mild, are good shippers and vigorous growers. Set out a quantity of either or both of these varieties and have peppers on the market much earlier than peppers grown from seed. These plants are full bodied and strong and you'll be much more sure of a full crop than if you depend upon growing from seed. *Prices by parcel post, prepaid*: 100 plants for 75c; 500 plants for \$2.00; 1,000 plants for \$3.00. *Prices by express collect*: \$2.50 per 1,000 for any quantity.

FULWOOD'S HOT PEPPER PLANTS

Long Red Cayenne Variety: Price by parcel post, postpaid: 50c per dozen plants. Write for prices on larger lots.

Deposit, N. Y., July 19, 1934.

Dear Sir: We have never seen firmer heads of cabbage with a better flavor. All other plants purchased from you are doing fine. We certainly do praise your plants to all who come to buy or look at our garden. Yours truly, ISABELLA GOUOUD.

(See Special Garden Collections on Page 13)

FULWOOD'S EGGPLANT PLANTS

BLACK BEAUTY VARIETY

I specialize on this one variety because of its many merits. It holds its color exceptionally well, grows very large, has good shape and is of unusually good quality. The

Black Beauty variety is naturally early and if you'll grow it from my fine plants your crop will be just that much earlier. *Prices by parcel post, postpaid:* 100 plants for 75c; 500 plants for \$2.00; 1,000 plants for \$3.00. *Prices by express collect:* \$2.50 per 1,000 plants in any quantity.

Webb Cross Roads, Ky., Oct. 26, 1934.

Dear Mr. Fulwood: Owing to weather I set your cabbage plants out April 2nd and regardless of the drought they were ready for market by June 20th. I have used your plants for years and expect to use them as long as I can get them.—FRED B. ROBERTSON.

Corydon, Iowa, Oct. 30, 1934.

Dear Sir: I call your plants drought proof, for the hot, dry weather we have had throughout this section surely put them to a severe test. When the hot winds struck us the plants would lay nearly flat to the ground during the day but would straighten up at night. After the rains came the plants made a wonderful growth and I had all the cabbage I could use. My neighbors could hardly believe their eyes when I showed them the tomatoes I picked from my garden. I tell everyone if they want cabbage and tomato plants that will produce well in all kinds of weather they should order Fulwood's plants.—MRS. M. HASKELL.

Olney, Ill., Sept. 3, 1934.

Dear Sir: I ordered my cabbage plants from you on March 1st and by May 1st we had plenty of cabbage to use. Your plants are the best ever.—MRS. JOHN LEWIS.

Springfield, Tenn., Sept. 29, 1934.

Dear Mr. Fulwood: I never had such fine cabbage before. Your frost-proof plants are the finest I ever got anywhere. I had such good luck selling my cabbage as they were earlier than any around here. I will send you a larger order next year.—J. H. HALEY.

Greenfield, Ind., Oct. 3, 1934.

Dear Mr. Fulwood: Last spring I purchased ten thousand cabbage and onion plants from you, which I set out on April 10th, in which I realized a nice sum of money. Your frost-proof plants develop about two weeks earlier than home-grown plants and therefore, reach the early market at handsome prices. With the aid of Fulwood's splendid plants I make a good living for six of us.—BURT SWAIN.

(See Special Garden Collections on Page 13)

FULWOOD'S BROCCOLI PLANTS

Green Sprouting Variety

A sufficiently new vegetable to bring a good price especially in city markets where the demand is growing fast. Many smaller heads will form after central head is removed, and will keep bearing for 8 to 10 weeks. Prices by parcel post, postpaid: 100 plants for 75c; 500 plants for \$2.00; 1,000 plants for \$3.00. Prices for shipment by express collect, any quantity, \$2.50 per 1,000 plants.

FULWOOD'S KOHL RABI PLANTS

Early Purple Vienna Variety

Extremely early. Bulbs grow to the size of a small apple. The flavor is a combination of cabbage and turnip flavors. Kohl Rabi is at its best when grown from plants. Prices same as for Broccoli plants.

FULWOOD'S BRUSSELS SPROUTS PLANTS

Long Island Improved Variety

Tiny little cabbages which grow in sprouts close on the stalk at each leaf joint. Sweet, tender and fine eating. Sprouts are from 1 to 2 inches in diameter. My plants will give you the best crop. Prices same as for Broccoli plants.

Federalsburg, Md., July 28, 1934.

Dear Mr. Fulwood: Your frost-proof cabbage plants did fine under all conditions, as we had several snows after they were put out and quite a bit of freezing weather, followed by heavy rains. Sometimes they were covered with water, but they came through with only three plants missing out of five hundred, and everyone stopped and admired how large and even they grew and asked why my cabbages were so much ahead of my neighbors. Not a single plant went to seed and the cabbage was sweet and tender and I had no trouble getting a sale for it. I was also delighted with my onion and lettuce plants. It was my first experience with head lettuce but it was a real success. Our finest garden in twenty years! Respectfully yours, MRS. JACOB N. COULBOURNE.

International Falls, Minn., Sept. 11, 1934.

Dear Sir: I was very proud of my small cabbage field, which was planted with the plants I got from you last spring. I have found out that the Fulwood frost-proof cabbage plants to the best. Very truly yours, JOHN SKRUMEDA.

Lebanon, Ohio, July 2, 1934.

Dear Sir: I ordered your double frost-proof collection No. 2. Plants received in good condition. We sure had some cold, frosty mornings with temperatures as low as 18 to 20 degrees. All plants came through fine even though we had very little rain.—W. L. BROWN.

(See Special Garden Collections on Page 13)

SPECIAL COLLECTION OF FULWOOD'S GENUINE FROST-PROOF PLANTS

Ready Now

FROST-PROOF COLLECTION No. 1

200 Early Charleston Wakefield Cabbage Plants.....	\$.60

HOW FULWOOD'S PLANTS ARE PACKED

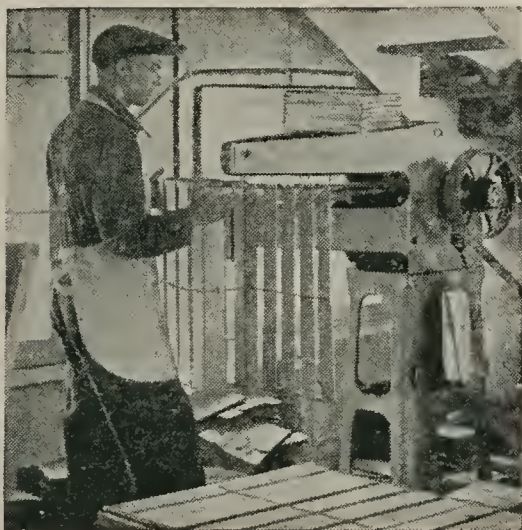

ONION PLANTS IN CRATE

CABBAGE PLANTS IN CRATE

After I have grown the very finest plants possible to grow, it would be downright foolishness to pack and ship them in any manner whereby I would run the slightest chance of their not reaching you in perfect condition. I use the best and most expensive crates I can buy and I have perfected my packing and shipping methods to the point where I can fully guarantee all my plants will arrive at destination in perfect condition for planting. All plants are pulled one at a time, sorted, counted, bundled, packed, crated and shipped, all on the same day. This insures maximum freshness at the time of shipping. All shipments are made on the same day orders are received, except when unusually bad weather prohibits getting into the fields for a day or two. I could pull my plants several days ahead and keep them in cold storage, as some plant growers do, but such methods would prohibit my iron-bound guarantee of all plants arriving in perfect condition.

My twenty-five years of experience has taught me much about sorting, bundling, packing and

ASSEMBLY OF CRATES

(See Special Garden Collections on Page 13)

crating and when your plants arrive you'll have a good full count—they'll be correctly packed in light-weight wire bound, strong, well ventilated crates and there will be no runts or damaged plants. My shipping crates are assembled right here with my own machinery. I have designed the correct kind of crates for each plant and all shipments will arrive at destination with crates and contents intact.

The kind of plants, the season of the year, and other factors to be considered, determine whether the roots of the plants shall, or shall not be packed in damp moss and wrapped in waxed paper. Such packing is not always advisable and inasmuch as I guarantee my plants to arrive in perfect condition I reserve the right to select the most proper method of packing at the time shipments are made.

All Genuine Fulwood plants are perfectly produced and shipped—they are priced exceptionally low, especially for plants of such high quality—they will produce vegetables of the very highest quality at the very earliest possible time. Place your plant orders where you can obtain such dependable service from a really responsible grower. Tear out one of the order blanks in this catalog, fill it in carefully being sure to write your name and address plainly and mail it to me with your remittance and you'll receive the finest plant satisfaction you've ever received. You'll be notified by mail the day your plants are shipped.

P. D. FULWOOD

PLANT GROWER

TIFTON, GA.

THE high speed tractor seeders shown above can seed fifty acres per day. It takes plenty of high class equipment like this to successfully operate my vegetable plant plantation which contains nearly two thousand acres of the South's finest plant growing soil.

The bottom illustration is one of my many fields and shows a harvesting crew pulling tomato plants one at a time by hand. No runts, no trash—every plant must be as perfect as I know how to make it.

FULWOOD'S PLANTS PRODUCE BUMPER CROPS
